What is Logistics and Supply Chain Management? "Logistics typically refers to activities that occur within the boundaries of a single organization and Supply Chain refers to networks of companies that work together and coordinate their actions to deliver a product to market. Also, traditional logistics focuses its attention on activities such as procurement, distribution, maintenance, and inventory management. Supply Chain Management (SCM) acknowledges all of traditional logistics and also ...

[What is Logistics and Supply Chain Management?](#)

Supply chain refers to a large network of organisations that work collaboratively to deliver products from a supplier to a customer. Logistics Management, on the other hand, is the coordination and moving of resources, and forms part of the supply chain. Logistics Management focuses on the management of daily operations concerning the final product of the organisation.
